

City of Indianola
Wastewater Treatment Facility – Informational Meeting
July 30, 2018

Overview of Indianola Wastewater Treatment Plant

- Antideg and facility plan review
- Ready to start final design
- Field survey and geotechnical investigations will start in the fall
- Scheduled to bid next summer

Review of Site Plan

- WWTP designed into hillside
- WWTP is generally on ~20 acres
- Most of the existing trees will remain
- One entrance into the plant
- Perimeter fencing with security

Entrance to the new plant site

Looking northwest standing on the Cavitt Creek bridge east of plant site.

Looking northwest on top of the hill east of the plant site on Grimes St.

Looking west at the intersection of 115th Ave and Grimes PL Arrow is pointing at north tree line where the new plant will be located

Changes Since Last Time We Met

- WWTP discharge moved to Middle River
- WWTP moved to north on site
- Eliminated access road to the west
- WWTP will be built into the hill
